Award Recipient**
from Trinity College
Dublin.

**First-Class Honours
(3.88 GPA)**
every year of my
degree to date.

**Received Award for
“Outstanding Project”**
in the 2023 TCD
SwEng Showcase.

Skills

Tools

HTML, CSS,
JavaScript, Node.js,
React, React Native,
Java, Python, C, C++,
MySQL

Additional

Adobe Photoshop,
Figma, Microsoft
Office

Strengths

- Problem Solving
- Quick Learning
- Flexibility
- Enthusiasm
- Organisation
- Leadership
- Customer Service

Profile

I am a 5th Year Master of Computer Science Student. I am passionate, driven, and a natural problem solver leading me to work well in challenging circumstances. My desire for organisation and efficiency reflects clearly in my work and lets me write code that is both clear and concise. Not only am I capable of working well both alone and in teams, but I have experience in leadership positions and show clear, consistent initiative.

Education

MCS Computer Science
Trinity College Dublin

Sept 2021 – Present

Work Experience

Software Development Engineer Intern
Workday

February 2025 – August 2025

- Contributed to development and implementation of Generative UI system and components for use within AI assistant side panel.
- Developed and maintained several user guidance features.
- Contributed to short and long-term company objectives.

Cinema Host
Odeon Cinemas

June 2021 – January 2025

- Worked with a team of 50+ to provide outstanding guest service.
- Contributed ideas to improve the efficiency and quality of company processes.
- Demonstrated excellent customer service, time management, and team-working abilities.

Notable Projects

DUCSS App

- React Native application for the Dublin University Computer Science Society utilising Google Firebase to provide user authentication and database features.
- Offered information about the society, voting mechanism, member engagement features, and exclusive discounts.

Portfolio Website

- Personal portfolio website in React to provide information about myself and my work.
- Wrote several components to display information in unique and interesting ways.

Taxy: AI Taxonomy Builder

- Served as Team Lead for a team of 11 working in collaboration with Quantexa as part of the Trinity College Software Engineering Project.
- Developed interactive taxonomy builder in React allowing users to build on and visualise relations through AI generation.
- Utilised effective prompt engineering to improve results.

County Hunter

- Developed a web-based multiplayer geolocation game in React where players compete to complete a gauntlet with the highest score.
- Utilised Google Firebase to provide user authentication and server logic. Designed with Figma and user tested.
